Detalii specifice:

Pentru utilizarea aplicatiei este necesara instalarea Entity Framework versiunea 6.2.0

```
<?xml version="1.0" encoding="utf-8"?>
<packages>
  <package id="EntityFramework" version="6.2.0" targetFramework="net472" />
</packages>
```

Aplicatia este extrem de usor si intuitiv de folosit. Initial, utilizatorul are de ales intre a cauta/selecta o fotografie si de a adauga una. In functie de alegerea facuta, acesta este transmis catre alte tipuri de form, un exemplu fiind cel de mai jos.

In mod similar este si fom-ul specific cautarii unei fotografii.

The screenshot shows a web application window titled "Add image". Inside the window, there is a form with the following elements:

- A text input field labeled "Title".
- A date picker labeled "Date" showing "Monday, March 16, 2020".
- A text input field labeled "Description".
- An "Upload" button below the description field.
- A large empty rectangular area below the "Upload" button.
- At the bottom of the window, there are two buttons: "Add" and "New".
